The European intelligence which has come to hand during the last few months has been, for the most part, of that commop-place kind requiring few remarks. But, suddenly, Switzerland is in an alarming state. The excitement in England, growing out of the elections, has for the moment prevented an examination of the Neufchatel question by the leading English journalists. The five great powers-Russia, Austria, Prussia, France, Englandwho signed the London protocol, restoring Neufchatel to Prussia, signed away Swiss constitutional liberties, and a formidable resistance is threatened by the republican party. Neufchatel cannot exist as a Prussian principality and a Swiss canton. The claims of Prussia are not likely to be recognized by the canton, or the Swiss Confederation, and it is plain that, sooner or later, this question will become a European one. The pulse of Europe is now calm, yet it is an unnatural quietness that forebodes evil. The iron hand of despotism has crushed the liberties of peoples in Europe, and only one breathing-spot remains, and that is Switzerland. Russia and Austria would blot that country from the map by transferring it piecemeal to Neufchatel is now plunged into an intense excitement, and it will not be the fault of the King of Prussia and his adherents if a civil war do not break out, not only in that Canton, but throughout Switzerland. ## Died.

In Hodgenville, Ky., on the 17th of July, Thomas Brows; in the 18th year

The deceased was one of my earliest play-mates. On the bank of the beautiful stream where he now lies cold and silent in death, we oft have wandered in our childhood's fleeting hours-in the bright and joyous May-time and gathered the early flowers that bloomed all lovely on its margin. There, too, at Autumn's melancholy time we've with hearts o'erjoyed with happiness. Ah, then the thought ne'er came, that those tall trees should wave above his lifeless form, and that sweet stream should sing a mournful requim to his sleeping dust, ere manhood wrote its signature on his brow. But 'tis even so-that youth, once so joyous and glad, with heart so generous and kind, bloomed forth like some delicate flower to meet the early frosts of Death .-Tis ever thus on earth-the ones our hearts love most, are the soonest to decay. He sleeps beside his sweet and gentle sister, who passed too soon away. But it will not be their eternal home .-No! there is a day swift coming on the wing of time when the dead shall come forth and put on the wings of their Immortality. Oh! then we trust that they may mount from their charnel house and flee away and be at rest .-And in the glorions bounds of the Heavenly Eden, we hope to meet them and dwell forever with the God of love. ANY years of trial, instead of impairing MANY years of trial, instead or impairing the public confidence in this medicine, has for it an appreciation and notoriety by far exceeding the most sanguine expectations of its friends. Nothing but its intrinsic virtues ad the unmistakable benefit conferred on sands of sufferers, could originate and maintain the reputation it enjoys. my inferior remedies thrust upon the combaities, have failed and been discarded, this has gained friends by every trial, conferred benfits on the afflicted they can never forget, rkable to be forgotten.

While it is a fraud on the public to pretend that any one medicine will infallably cure-still there is abundant proof that CHERRY Pecst invariably cure the maladies for which it s employed.

As time makes these facts wider and better nown, this medicine has gradually become th best reliance of the afflicted, from the log cabin of the American peasent, to the palaces of Curopean Kings. Throughout this entire ountry in every State, city, and indeed almost very hamlet it contains, Cherry Pectoral is snown as the best remedy extant for diseases f the Throat and Lungs, and in many foreign ountries, it is coming to be extensively used Britain, France and Germany, where the medical sciences have reached their highest erfection, Cherry Pectoral is introd and in constant use in the Armies, Hospitals, Alms Houses, Public Instruction, and in domes ic practice, as the surest remedy their attend-Physicians can employ for the more dan crous affections of the lungs.
